SESSION RECOMMENDATIONS:
The participants of the Urban Safety Governance open session held at the Africities Summit in Marrakech, Morocco recommend that:

1. To understand the value of data lead processes, that facilitate evidence base strategies.

2. Adopt the promotion of the urban safety governance approach as an enabler of social inclusion and spatial transformation among other cities in South Africa.

3. Promote inclusive, safe and resilient communities through programmes or projects that forges transversal implementation of the Urban Agenda applying safety approaches.

4. Begin to articulate and understand the costs associated in achieving the implementation of the sustainable development agenda.

5. Ensure proper stakeholder management inclusive of non-state actors, as a parallel process to the implementation of urban safety governance with an emphasis of co-delivering through participatory planning and implementation.
