Transforming urban Africa through Safe, Inclusive & Accessible Public Spaces

FROM STRATEGY TO IMPLEMENTATION

Nov. 23, 2018
9.30 - 12.30 PM
Room: Tanger

The training will equip city leaders and other actors with steps & tools for conducting citywide inventories and assessments of public spaces, and reflect on challenges and opportunities for implementing SDG 11.7 in African cities. It draws from UN-Habitat’s work across the continent, KTH Future of Places’ work on public spaces & placemaking, and Johannesburg’s experience in concrete implementation. It is envisaged to be a learning exchange that brings together city leaders and other players in the urban development arena.
